Number of Buildings: 1
Number of Stories: 2

Project Type

Product Type: Commercial / Retail
Contract Type: Negotiated GMP

Project Team:

Owner: Columbia Sportswear
Architect: Hill/Glazier Architects

Project Description:

The unique Columbia Sportswear Flagship Store project included the seismic upgrade, historic renovation and underpinning of an existing heavily-timbered Portland landmark built in 1888.

Built as a post-and-beam structure, the remodel was completed while the upper floors were fully occupied. High-end interior finishes included a radius steel staircase with ornamental railings, exposed beams, stone and wood floors and several 25-foot tall peeled Douglas Fir trees.
